

Drainage services overview

TANKERING • JETTING • DRAINAGE CCTV

Delivering drainage solutions for over 25 years

We provide tankering, jetting and drainage CCTV to the public and private sectors including residential, commercial, hospitality and retail. We are proud of the long-term relationships we have built with clients and partners, delivering cost effective, robust and dependable services.

Registered Waste Carrier

Business name	Edincare
Registration number	CBDU135964
Company number	02812959
Expiry date	10/10/2022

Why choose Edincare?

Edincare maintains thousands of sites throughout the UK delivering:

- ✓ A comprehensive range of vehicles
- ✓ Fully trained service engineers
- ✓ Nationwide coverage
- ✓ ISO9001 accredited, Safe Contractor and NADC approved
- ✓ Free technical advice
- ✓ Flexible payment option including monthly direct debit
- ✓ Service agreements for scheduled visits and priority bookings

24/7

Emergency call outs

We offer support 24 hours a day, 7 days a week, nationwide to help you with your pumped and drainage emergencies. With our fleet of service vehicles nationwide, we can respond to emergencies quickly.

A comprehensive range of services, expertly provided

First class customer service

You will be assigned with a dedicated, single point of contact on our Service Helpdesk, who will familiarise themselves with your business and look after your assets. We will provide a Service Call Report after each site visit, ensuring transparency and clear communication at all times. We aim to deliver a 'first time fix' each time, made possible with our experienced engineers and fully equipped service vehicles.

Our health and safety responsibility

We have worked diligently to be awarded the most important industry-recognised health and safety accreditations. Our engineers are fully trained in all aspects of working with pumped and drainage systems, as well as being trained in the use of gas detection equipment and confined space entry procedures.

Real time reporting

Using the latest tracking technology, we are able to gather real-time information from our engineers and track their progress on live jobs. Our interactive screens at our head office enables the team to keep clients up-to-date on the current status of their works, and for us to efficiently manage engineers' workloads.

TANKERING

Our fleet of tankers provide a fast and effective service to remove waste water from site and dispose of it at a waste disposal plant. This includes septic tanks and cesspits, interceptors, pumping stations, road gullies and fat, oil and grease traps to name a few. Our tankers' suction hose can be supplemented by our support vehicle when longer runs are required.

JETTING

We provide high pressure jetting to safely and effectively break down and clear blockages, clean chambers and maintain a healthy drainage network. We jet a wide range of pipework sizes including drains, rising mains and drainage channels. All our service vehicles have a jetting capability, 100m of hose and the ability to replenish water on site.

DRAINAGE CCTV

We provide drainage CCTV surveys of pipework from 50–200mm including drains, pumping stations, drainage channels and rising mains. These will discover the causes of a blockage so that appropriate remedial action can be taken. They can also be preventative, highlighting areas of concern before costly problems arise. We also offer pre- and post-construction drainage CCTV surveys.

CONFINED ENTRY

Confined spaces can be very hazardous to enter without the appropriate training, equipment and care. Our engineers are all fully trained and certified in using gas monitors and man-riding equipment for confined entry and rescue, so they can operate safely in these environments. Before any such task a RAMS is completed and all necessary permits are obtained.

**JETTING &
DRAINAGE CCTV**

450 litres jetting tank with 100m hose.
The jetting tank can be replenished on site.

Brings additional suction hose to site to support the tankers when required.

Confined entry rescue and work equipment.

Drainage CCTV equipment.

**7.5t
COMBI-TANKER**

440 gallons (2,000 litres) tankering capacity.

220 gallons jetting tank with 100m hose.
The jetting tank can be replenished on site.

Additional suction hose can be supplied by support vehicles.

Confined entry rescue and work equipment.

Drainage CCTV equipment.

1,930 gallons (8,770 litres) tankering capacity.
 220 gallons jetting tank with 100m hose.
 The jetting tank can be replenished on site.
 Additional suction hose can supplied by support vehicles.
 Confined entry rescue and work equipment.

2,700 gallons (12,275 litres) tankering capacity.
 500 gallons jetting tank with 100m hose.
 The jetting tank can be replenished on site.
 Additional suction hose can supplied by support vehicles.
